Note:

The Government of Nepal has established the Crisis Management Center (CCMC) in order to develop information system, human resources and other resources to combat the COVID-19 induced crisis.

According to CCMC, it is mandatory for all passengers to fill up the following form by clicking on the link below.

Link: https://ccmc.gov.np/atms

Mandatory Passenger Details:

Effective 26 January, all passengers 2 years of age and older are required to get a COVID-19 viral test (nucleic acid amplification/PCR test or a viral antigen test) within 3 days before departure to the US. Passengers must provide written documentation of their negative test result (paper or electronic copy) to the airline. Test results must show the name, specimen collection date and type of test done. Test results where the testing date is more than 3 days before departure will not be accepted.

Alternatively, passengers may provide official written documentation of a positive COVID-19 test result within the last 3 months alongside a letter from their healthcare provider or a public health official that they have recovered and are cleared for travel. Together these are referred to as 'documentation of recovery'.

All passengers age 2 and above travelling to the USA will be required to sign an attestation prior to departure (parent or other authorized individual may attest on behalf of passengers aged 2 to 17) confirming they meet the requirements and thus cleared to travel. Please ensure you you download, print, complete and sign the attestation form before reporting to check-in at the airport. Passengers who do not attest will not be permitted to travel.

Customer Support:

10:00 AM to 6:00 PM (GMT+5:45) SUN - FRI
